

Quant Week 5

3/13/25

Agenda

1. Icebreaker Question
2. Brainteasers
3. Zetamac?
4. VWAP & TWAP
5. Project

Ice Breaker

What's your bench press?

Weekly Sequence

$\frac{1}{2}, \frac{2}{3}, \frac{3}{5}, \frac{5}{7}, \frac{7}{11}, \frac{11}{15}, ?$

Brain Teaser

If a stock shows a "Bullish" trend, there's a 30% chance the next trend will also be "Bullish" and a 70% chance it will be "Bearish". If the stock shows a "Bearish" trend, there's a 20% chance the next trend will be "Bearish" and a 80% chance it will turn "Bullish". If the stock is currently showing a "Bullish" trend, on average, how many trends will we see until the next "Bullish" one?

Please round to the nearest hundredth.

Project Discussion/Work Time
